

DANISH BUSINESS SEMINAR

NEW DEVELOPMENTS IN ENERGY EFFICIENCY AND ENERGY RECOVERY

**Monday 17 September 2018,
12:15–13:15**

Room: Business Forum 2

Water and wastewater systems use between 2 and 4 percent of the total energy in the world. Therefore, energy efficiency and recovery of energy in the water sector are high on the agenda in Denmark.

The Danish Minister for Environment and Food will introduce the seminar and the Danish approach to energy savings and efficiency, followed by concrete examples from a major Danish wastewater treatment plant.

PROGRAMME

- 12:15 / **The Danish approach to energy savings and energy recovery/production in the water sector**
Minister of Environment and Food, Jakob Ellemann-Jensen
- 12:25 / **Energy efficiency – Copenhagen WWTP approach towards energy neutrality**
