

DANISH BUSINESS SEMINAR

NON-REVENUE WATER AND REDUCTION OF LEAKAGE

Tuesday 18 September 2018,

12:15–13:15

Room: Business Forum 2

In many parts of the world water resources are overexploited making it difficult to fulfil the drinking water demands. At the same time the leakage of water in many utilities is high. New developments in leakage management and use of data will be presented.

PROGRAMME

- 12:15 / **The Danish drinking water system, mapping and protection approach**
Global Market Director Søren Hvilshøj, Rambøll
- 12:25 / **Reducing water leakage in practice**
Director of planning Brian Hansen, Greater Copenhagen Utility
- / **6 percent water loss by intelligent solutions, next step reaching 3 pct. with AI**
CEO Jens Bastrup, Skanderborg Forsyning
- 12:45 / **Detecting and categorizing water loss with smart metering**
Head of Product Management - Water Solutions Kristian Rokkjær, Kamstrup
- 12:55 / **The Leakman Project – a tool to reduce leakage in drinking water systems**
