

# Accelerating the green transition together

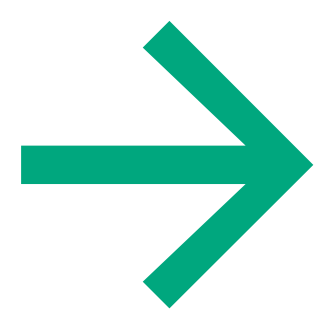

## Together we pave the way for a more resilient and sustainable society

We face many of the same challenges and share many of the same goals and ambitions related to reducing climate and environmental impact. Investments in and commitment to the green sector are growing, and over the years, increased collaboration between the private and public sector has seen the day of light. We have come a long way, but there are still decisions to be made and actions to take.

Only through dialogue, knowledge sharing, and collaboration can we accelerate the transition and create new jobs in a more sustainable, low-carbon, and resource efficient global society.
