

Connect with world-class technology providers

As a pioneer in wind energy, Denmark is home to some of the world's leading energy companies, utilities and research institutions paving the way for green energy transition and a global deployment of renewables.

State of Green assists high-level policy-makers, utilities, companies and public authorities, looking to procure cleantech solutions and form partnerships with Danish stakeholders.

As a one-stop shop to more than 600 Danish solution providers, State of Green connects international peers and partners with Danish stakeholders within green energy transition and wind power, both onshore and offshore.
