# Connect with world-class technology providers

As a pioneer in wind energy, Denmark is home to some of the world's leading energy companies, utilities and research institutions, all driving the global shift towards green energy and the widespread adoption of renewables.

State of Green assists high-level policymakers, utilities, companies and public authorities seeking cleantech solutions and partnerships with Danish stakeholders. Serving as a one-stop shop for over 600 Danish solution providers, State of Green connects international peers and partners with Danish experts in green energy transition and wind power, both onshore and offshore.
